

DPD-2244-79
Copy 5 of 6
3 April 1979

Dear

Mr. B. has requested that we consider handling our Contracts SP-1917 and 1918 in a different manner as of July 1, 1979. The thinking being that the call and T&M type could be combined into one master contract. Against this master contract we would issue task orders. The work envisioned by each task would be as follows:

Task No. 1 - Work of a research and development nature, Test Site, Flight Crews, etc.

Task No. 2 - Spare parts, IRAN, product improvement, modification & overhaul.

Task No. 3 - Guard service, telephone service, training technicians for use under Contract SC-79, etc.

Mr. B. would also like to have a separate contract written for the J-75 engine program. This contract would be retroactive to pick up costs already incurred on the J-75 work.

Your comments and proposals along these lines would be appreciated. Contracts SP-1917 and SP-1918 would continue for Customer No. 2 if acceptable to you.

Sincerely yours,

/s/
Dan
